

# Management Software

Gold – Pawn – Service – Retail – POS

## Accounts Management Manual

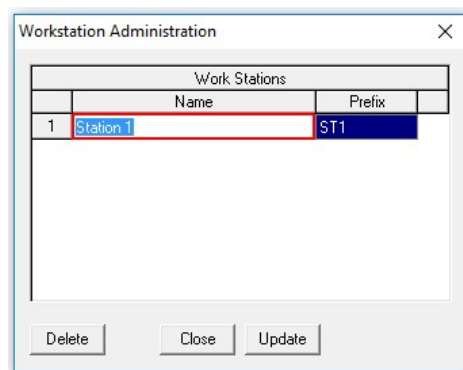

## Setting up the program for the first time

Once the program has been installed the defaults need to be set in order to use the program. Double click on the program icon on your desktop or select the program from the 'Start Menu'.

The login screen will appear asking you to insert your name and password, as this is the first time you are using the program type 'Administrator' as the user name and 'password' for the password.

## Workstation Administration

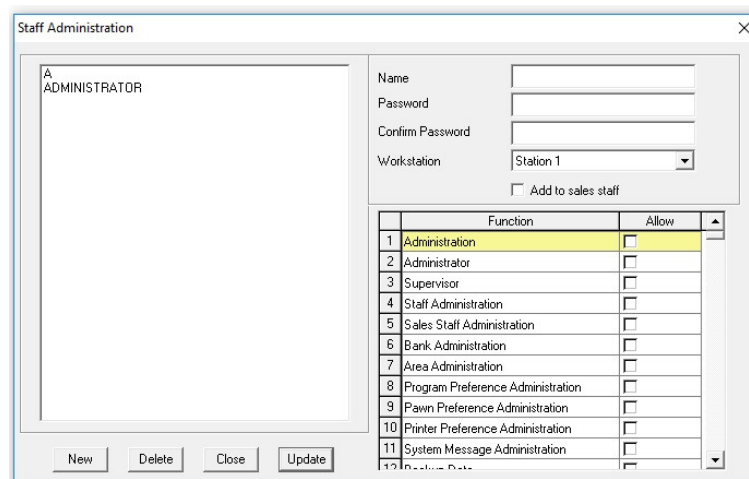

Here you can give each of your workstations a name and prefix, this is used in the Cashbook and General ledger, you can also print sales reports by workstation, and each user in the Staff Administration can be captured with the workstation they will use.

## Staff Administration

These are the people employed by you who either sell for you or are office staff that will be using the program. Select 'Staff Administration' from the 'Administration' menu item.

Each person can have different access rights to the program. The rights are divided into the different menu items, when a item is checked for a person he has access to that item and can administer the task.

## Setting user privileges

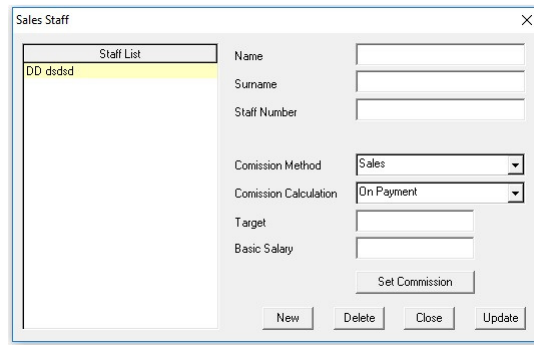

<b>Administration</b>	
Administrator	This person can do everything in the program and is the main custodian of the program. You do not need to check any other item as the administrator is able to access all of the program.

# Sales Staff Administration

The 'Sales Staff' window contains a 'Staff List' table on the left with one entry 'DD ddsdd'. To the right are input fields for 'Name', 'Surname', and 'Staff Number'. Below these are dropdown menus for 'Commission Method' (set to 'Sales') and 'Commission Calculation' (set to 'On Payment'). There are also input fields for 'Target' and 'Basic Salary', a 'Set Commission' button, and a row of buttons at the bottom: 'New', 'Delete', 'Close', and 'Update'.

Select the salesperson to be edited, the items are:

**Workstation** Select the workstation the sales person belongs to.

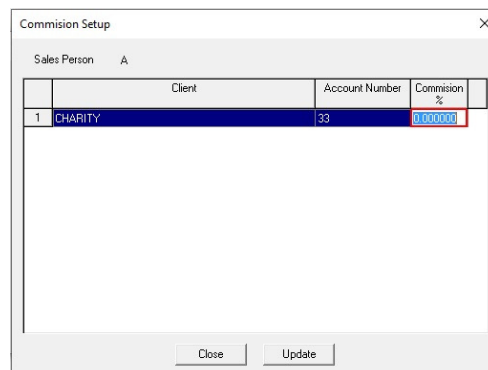

**Commission Method** This is what figure will be used to calculate the member's commission. These options are Sales where the total sales value is used or Profit where only the profit is used for the calculation.

**Commission Calculation** This is how the commission will be calculated, on all the invoice amounts or only on paid invoices.

**Target** This is the target that the salesperson must meet every month.

**Basic salary** This is the salary he will receive before commission.

[Set Commission](#)

The 'Commission Setup' window shows a table for 'Sales Person A'. The table has columns for 'Client', 'Account Number', and 'Commission %'. The first row shows '1 CHARITY' with '33' in the 'Account Number' column and '0.000000' in the 'Commission %' column. The 'Commission %' cell is highlighted with a red border. At the bottom are 'Close' and 'Update' buttons.

	Client	Account Number	Commission %
1	CHARITY	33	0.000000

The % commission for each client that the salesperson receives is inserted here.

Select the client from the client selection dialog and enter the Commission % and enter.

# Program Preferences

	Preference	Value
1	General	
2	Use System Date	No
3	Company Name	
4	Company Address	
5		
6		
7	Company Post Code	
8	Company Telephone No.	
9	Company Fax No.	
10	Company Bank Name

## Stationary Administration

Please refer to the Stationary Administration manual on how to create the stationary.

## Bank Administration

A screenshot of a 'Bank Names' dialog box. The dialog has a title bar with 'Bank Names' and a close button (X). Inside, there is a table with one column labeled 'Bank Name'. The first row of the table is highlighted with a red border. Below the table is a large empty rectangular area. At the bottom of the dialog are three buttons: 'Delete', 'Close', and 'Update'.

Bank Name

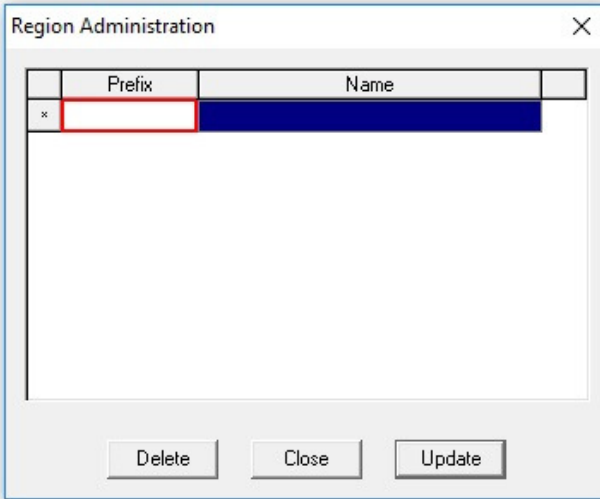

Delete Close Update

These are the bank names used throughout the program, they can be edited and entered here. There cannot be duplicate bank names.

Select 'Bank Administration' from the 'Administration' menu item.

Click on the position in the list where you want to enter or edit a name. Click 'Update' to save the names or select the name you want to delete and click the 'Delete' button.

## Region Administration

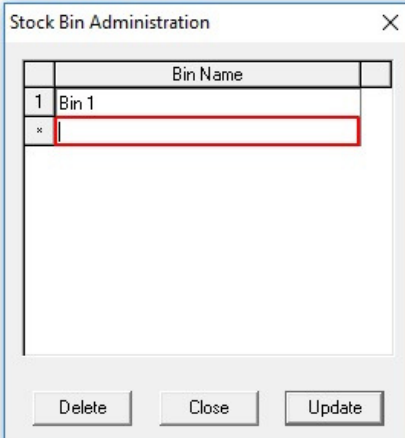

The 'Region Administration' window features a table with two columns: 'Prefix' and 'Name'. The first row contains a blue selection box with an 'x' icon, an empty 'Prefix' field, and a blue 'Name' field. Below the table are three buttons: 'Delete', 'Close', and 'Update'.

	Prefix	Name
x		

Sales staff, Debtors and Creditors can be grouped into different regions, the names are entered here. Select 'Region Administration' from the 'Administration' menu item. Entered the regions that your company requires, the prefixes are used in the Chart of Accounts. Once you have entered all the names press 'Update' to save and 'Close' to exit the screen

## Stock Bin Administration

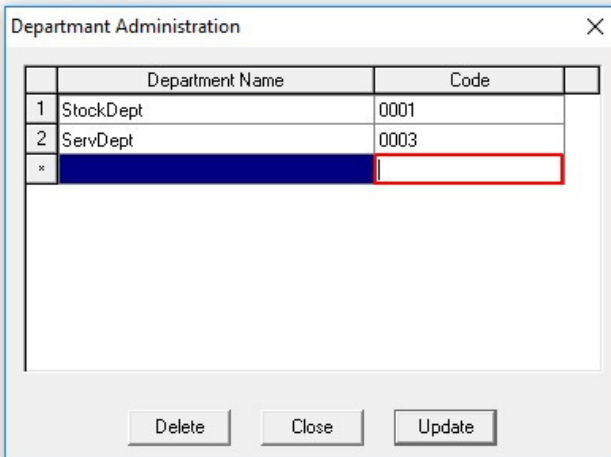

The 'Stock Bin Administration' window features a table with one column: 'Bin Name'. The first row contains a blue selection box with a '1' icon and the text 'Bin 1'. The second row contains a blue selection box with an 'x' icon and an empty 'Bin Name' field. Below the table are three buttons: 'Delete', 'Close', and 'Update'.

	Bin Name
1	Bin 1
x	

The names of the areas where the stock are located in the warehouse are inserted here. Select 'Bin Administration' from the 'Stock' menu item. The first name entered as a bin cannot be deleted, change the name to a name that suits you. Once you have entered all the names press 'Update' to save and 'Close' to exit the screen.

## Stock Department Administration

The 'Department Administration' window features a table with two columns: 'Department Name' and 'Code'. The first row contains a blue selection box with a '1' icon, the text 'StockDept', and the code '0001'. The second row contains a blue selection box with a '2' icon, the text 'ServDept', and the code '0003'. The third row contains a blue selection box with an 'x' icon, an empty 'Department Name' field, and an empty 'Code' field. Below the table are three buttons: 'Delete', 'Close', and 'Update'.

	Department Name	Code
1	StockDept	0001
2	ServDept	0003
x		

The names of the departments for the stock items where they are located in the warehouse are inserted here. Select 'Department Administration' from the 'Stock' menu item.

The first name entered as a department cannot be deleted, change the name to a name that suits you. Once you have entered all the names press 'Update' to save and 'Close' to exit the screen.

## System Messages

The image shows a software window titled "System Messages". It contains three text input areas, each preceded by a label: "Message 1", "Message 2", and "Message 3". At the bottom right of the window is a button labeled "Update". The window has a standard title bar with a close button (X) in the top right corner.

The program has 3 messages that can be included in the printing of stationary, this can be used if you wish to advertise specials etc.

Enter the message and press Update to save it, if you want to remove it delete the message from the box and press Update.

# Debtors

Stock code	Description	Qty	Serial Number	Back Order	Price	Total
-						

There are 3 ways to start Invoicing, select 'Invoice' from the 'Debtors' menu, or press the 'F3' Key (Function Key 3) or click on the 'Invoice Icon' in the tool bar.

To select the client to be invoiced you can press 'F2', (Function Key 2) and select the client from the list. You can also select the client from the drop down list box in the invoice screen, another way is to click on the 'Client' button and select the client from the list, this way you can add or edit the client details by selecting the client to edit and clicking on the 'New/Edit' Key.

Once the client has been selected pressing the 'F2', key will list all the stock items that you can select for the item been sold. Press the 'Tab' key or 'Enter' Key to move across the grid to the Quantity column where you can enter the quantity sold, press 'Enter'.

If 'Insert Serial Number when invoicing' is set to 'Yes' in the preferences under the 'Debtor' Heading a box opens up under the Serial Number column heading where you can insert the serial numbers for the quantity inserted.

Press enter and add each serial number. When you have inserted all the serial numbers the box will close and you will be moved to the next column.

If you enter less than the quantity you will have to click on the 'OK' button or press the escape 'Esc' key, you can also press enter until the box closes.

If 'Insert Serial Number when invoicing' is set to 'No' and you have 'Always Use Serial Numbers' set to 'Yes' in the preferences you will be asked to select the serial number from the selection list.

Select the serial number in the list and press the 'OK' button or double click on the serial number you want this will close the stock grid. You can do a Zero Vat invoice by selecting the Vat selection from the 'Vat' drop down list. If you want to assign the invoice to a salesperson select the salesperson from the 'Sales' drop down list. You will need this if you want the system to calculate the sales commission. You must click on the 'Print' button to save and print the invoice or you can type 'Alt P'.

### GL Posting

If you have defined more than 1 type of invoice to post the GL to you can select the type by clicking the Invoice button and select the type. You can also select Cash sales if you want to treat the invoice as a cash sale, the payment will be added automatically.

### Method of Payment

This is how the customer pays for the sale, it can be Cash, Credit Card / Debit Card, Cheque, EFT or Account, Account is the default for this type of invoice.

### Reprinting Invoices

Should you have to reprint an invoice you can type the number of the invoice in the invoice number box and the invoice will be displayed for printing, click on the 'Re-Print' button and select your print and a copy of the invoice will be printed.

## POS Invoice

Point of sale invoicing can be used if 'Treat Invoices as Cash Sales (POS)' is set to 'Yes' in the Preferences under the 'Debtor' heading.

Items can be entered by typing the Stock Code box, using a bar code scanner or pressing 'F2' and selecting the item from the stock list. If 'Allow editing of Selling Price' is set to 'Yes' in the preferences under the 'Debtors' heading you will be able to edit the selling price. The quantity is changed by pressing 'F3' and editing the amount, if the client has a deposit / Lay-by on the item pressing 'F4' will retrieve it., 'F8' removes the item from the sale.

All POS sales go to the Cash control account by default, if you want it to go to a client's sales account select a client by pressing the 'Client' button or type in the client's account number.

### GL Posting

If you have defined more than 1 type of invoice to post the GL to you can select the type by clicking the Invoice button and select the type. You can also select Cash sales if you want to treat the invoice as a cash sale, the payment will be added automatically.

### Method of Payment

This is how the customer pays for the sale, it can be Cash, Credit Card / Debit Card, Cheque or EFT, Cash is the default for this type of invoice.

### Reprinting Invoices

Should you have to reprint an invoice you can type the number of the invoice in the invoice number box and the invoice will be displayed for printing, click on the 'Re-Print' button and select your print and a copy of the invoice will be printed.

## Credit Note

To select the client to be credited you can press 'F2', (Function Key 2) and select the client from the list. You can also select the client from the drop down list box in the invoice screen, another way is to click on the 'Client' button and select the client from the list, this way you can add or edit the client details by selecting the client to edit and clicking on the 'New/Edit' Key.

Once the client has been selected pressing the 'F2', key will list all the stock items sold to the client, where you can select the item been to be credited. Press the 'Tab' key or 'Enter' Key to move across the grid to Quantity

column where you can enter the quantity, press 'Enter' again and you will be moved to a new line where the next item can be inserted.

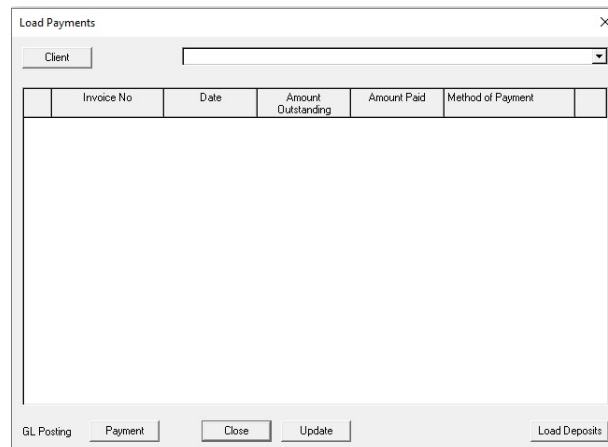

Once all items have been captured press the 'Esc' key to leave the stock grid and click on the 'Print' button to save and print the credit note or you can type 'Alt P'.

Credits can be captured for any items sold to the selected client, the entire sales price is credited. If you want to do a partial credit note you will have to do it in the 'Journal Posting screen'.

#### Reprinting Credit Notes

Should you have to reprint a credit note you can type the number of the credit note in the credit number box and the credit note will be displayed for printing, click on the 'Re-Print' button and select your print and a copy of the credit note will be printed.

## Load Payments

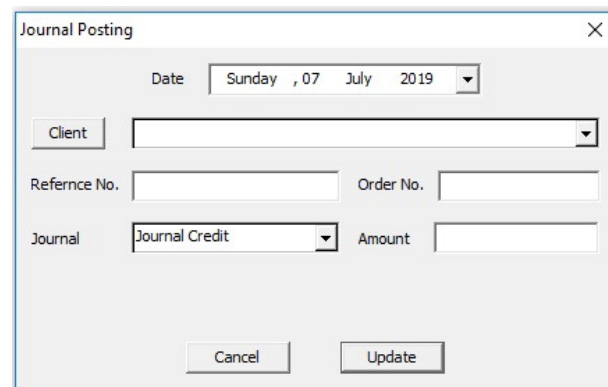

Invoice No	Date	Amount Outstanding	Amount Paid	Method of Payment
------------	------	--------------------	-------------	-------------------

When a client pays an invoice or invoices the payment must be loader here.

Select the client from the dropdown list and all the outstanding invoices will be loaded, insert the amount for each invoice paid and select the method of payment from the dropdown list. Press Update when complete to update the system.

## Journal Posting

Journal posting is where journal entries for a client's account are done.

Select 'Journal Posting' form the 'Debtors' menu to enter transactions.

Select the client you want to enter journal entries for. Select the date for each transaction and enter the reference, order no and select the Journal to post to from the drop-down list 'Journal'. If the Age Period is need it will be shown, select the period to enter to. Enter the and click 'Update' to insert.

## Statements

Statements

Month: May Year: 2019 Statement Date: Wednesday, 26 June 2019

	Account No.	Client Name
1		CASH SALES
2		aaaa
3		bbbb

☐ Select All  
☐ Audit Statement ☐ Print Using the Department

Client	Inv./Cr. No	Date	Description	Debit	Credit	Outstanding
--------	-------------	------	-------------	-------	--------	-------------

Statements can be listed or printed for any period selected. If the client is using the open item method all outstanding transactions are displayed on the statement and the payments for the selected period. The clients using the brought forward method will only have the selected periods transactions displayed.

Select the client or clients from the clients list, select the month to list, this will only show transactions done ending on the selected month end. If the month is before the current month transactions after the selected month end will not be shown. If you want a different date from the current date to be printed on the statement select the date from the 'Statement Date' drop down date.

'Audit Statements' if checked show all transactions done on the account including paid up invoices.

'Print using Department' lists the transaction by department, if the statement is printed a separate page is printed for each department. Press 'List' to display the statements, you can print this report by pressing 'Print'. The report can also be exported to a CSV file format that can be opened in excel.

To print the statements on you own stationary press 'Print Statements'.

## Age Analysis

Age Analysis

Clients

Account Number	Name
1	CASH SALES
4	aaaa
5	bbbb

Client details can be edited here or new clients captured.

To edit a client, select the client from the list and change the details. A new client can be entered by clicking the 'New' button and entering the details, the clients name and account number must be entered.

### Region

Each client can be assigned a region for reporting.

### Hold

If the client is to be put on hold the 'Hold' check box is checked and a supervisor will have to authorise any transaction done on the clients account.

### Acc. Type

The way invoices are selected to do receipts / journal entries for the client is selected here, there are two ways receipts / journal entries is done.

Brought Forward here the earliest to the latest invoice is marked paid up.

Open Item where you have to select each invoice to receipt or a journal entry to be done against it.

### Terms

This is the period the client has to pay an invoice.

### Status

This is an indicator used in reporting to show the status of the client, you can type anything in here.

### List Archived Clients

Any client that was archived can be brought back by clicking this check box.

Select the client from the list and click 'Restore'.

### Client Notes

Notes can be inserted for any client and printed on their statement or used as an alert when invoicing the client. Select the client and enter the date and review date if you want to check the action at a later date. If you want an alert click on the 'Alert Note' check box. To print the note on the clients statement click the 'Inc. statement' check box.

If more than one note is selected for the alert or statement printing, the last note entered will be displayed.

Notes can be multi-line notes but can only have 255 characters.

## Archive Inactive Clients

Archive Inactive Clients

Archive clients who last transaction was before: Saturday, 07 July 2018

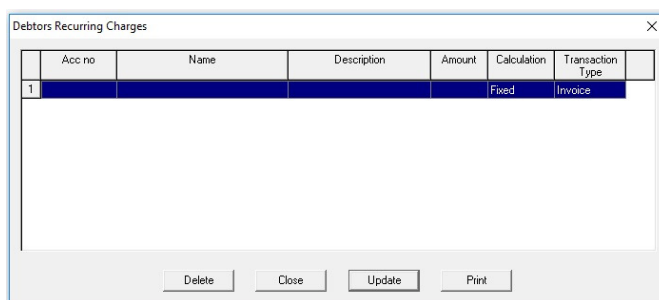

Close Archive

When an clients account becomes dormant you are able to move the client to the inactive client section.

When you enter this function the date is set to one year before the current year. Selected the date you want to use as the last date a transaction was done on the account, if there is a balance outstanding for the account it

will not be made inactive. You can reinstate the account again or if you enter the account no in any dialog and the account is inactive you will be prompted to restore the account.

## Recurring Charge Administration

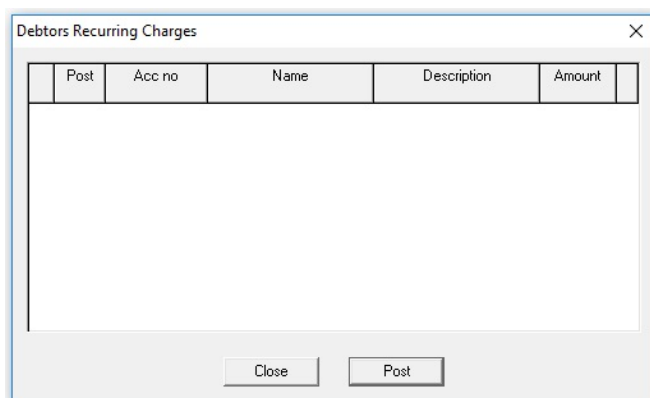

The 'Debtors Recurring Charges' dialog box contains a table with the following columns: Acc no, Name, Description, Amount, Calculation, and Transaction Type. The first row is highlighted in blue and contains the values: 1, (empty), (empty), (empty), Fixed, and Invoice. Below the table are four buttons: Delete, Close, Update, and Print.

	Acc no	Name	Description	Amount	Calculation	Transaction Type
1					Fixed	Invoice

Clients that need to be charged on a monthly basis can be setup here. Select the client from the 'Account No' drop down list and enter a description and the amount to be used for the calculation. If the calculation is a fixed amount enter the complete amount and select 'Fixed' from the drop down list. If you want to charge a percent of the outstanding amount of the client select 'Percent' from the drop down list. When a client's outstanding balance is zero and 'Percent' is selected the transaction will be ignored. Select the transaction type to perform from the transaction list. If you need to remove a transaction select the transaction and press the 'Delete' key. Note only Administrators and Supervisors can delete items.

## Post Recurring Charges

The 'Debtors Recurring Charges' dialog box contains a table with the following columns: Post, Acc no, Name, Description, and Amount. The table is currently empty. Below the table are two buttons: Close and Post.

Post	Acc no	Name	Description	Amount
------	--------	------	-------------	--------

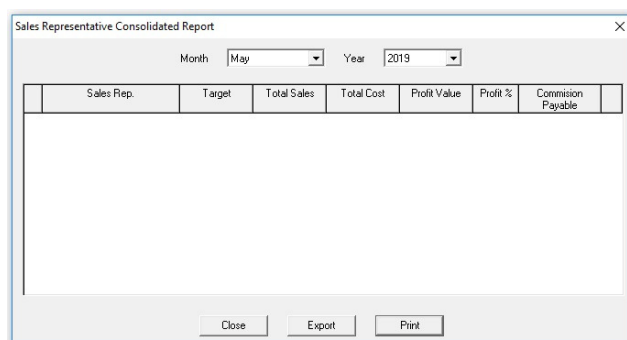

Recurring charges can be posted automatically when the month end routine is run or done manually. If the automatic method is selected in the preferences this menu item is disabled and no manual posting can take place.

Check each item you want to do.

Note if manual posting is done and you post the items more than once in a period the transactions will be duplicated.

## Sales Reports

### Consolidated Report

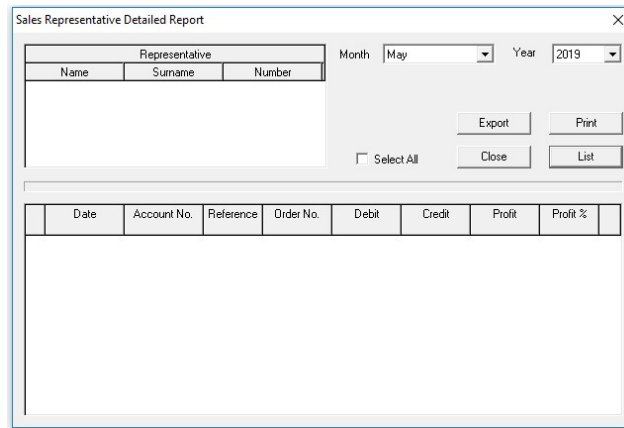

The 'Sales Representative Consolidated Report' dialog box features a header section with 'Month' set to 'May' and 'Year' set to '2019'. Below this is a table with columns: Sales Rep, Target, Total Sales, Total Cost, Profit Value, Profit %, and Commission Payable. The table is currently empty. At the bottom are three buttons: Close, Export, and Print.

Sales Rep	Target	Total Sales	Total Cost	Profit Value	Profit %	Commission Payable
-----------	--------	-------------	------------	--------------	----------	--------------------

This report shows each sales persons target value, commission %, sales value, profit value, profit % and commission payable to the member for the month selected.

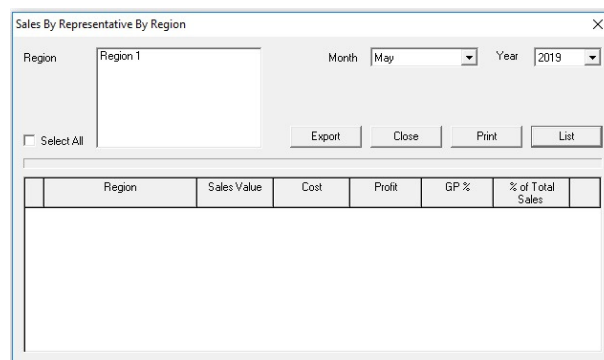

## Detailed Report

The 'Sales Representative Detailed Report' window features a 'Representative' section with fields for Name, Surname, and Number. To the right, there are dropdown menus for 'Month' (set to May) and 'Year' (set to 2019). Below these are buttons for 'Export', 'Print', 'Select All', 'Close', and 'List'. The main area is a large table with the following headers: Date, Account No., Reference, Order No., Debit, Credit, Profit, and Profit %.

This report shows a list of each transaction for the selected sales person and month of client invoices. The profit and profit % is also shown. You can select all the sales personal by clicking the 'Select All' check box.

## Group by Region

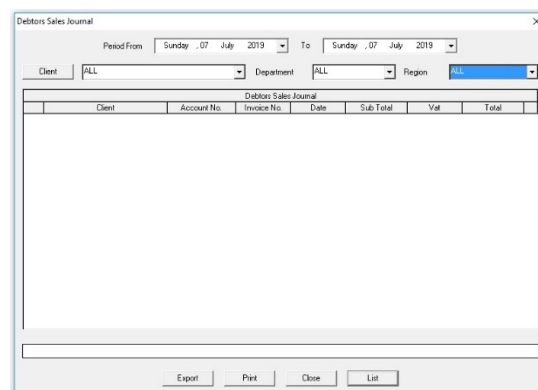

The 'Sales By Representative By Region' window has a 'Region' dropdown menu (set to Region 1) and 'Month' (May) and 'Year' (2019) dropdowns. It includes 'Export', 'Close', 'Print', and 'List' buttons. A 'Select All' checkbox is also present. The table below has headers: Region, Sales Value, Cost, Profit, GP %, and % of Total Sales.

Here we show the sales value, cost, profit, GP% and % of total sales for each region and month selected.

## Reports

### Debtors Sales Journal

The 'Debtors Sales Journal' window displays a date range from 'Sunday, 07 July 2019' to 'Sunday, 07 July 2019'. It includes dropdowns for 'Client' (ALL), 'Department' (ALL), and 'Region' (ALL). The table has headers: Client, Account No., Invoice No., Date, Sub Total, Vat, and Total. At the bottom, there are 'Export', 'Print', 'Close', and 'List' buttons.

The Sales for the selected period is listed here showing each invoice captured for the period selected. You can select the Department, Area and clients you want to list.

## Sales for a Period

Item No.	Client	Description	Serial Number	Date	Qty	Total	Cost	Profit	Is
----------	--------	-------------	---------------	------	-----	-------	------	--------	----

This report shows the transactions for items for the criteria selected. You can list this report for a selected period or if the 'List by Date' check box is checked you can list the report between selected dates.

Select the type of report, 'Invoices', 'Credit Notes', 'Payments / Journal Credits' or 'Journal debits'. Select the client if you want to display just this client, or leave as 'All' to show all clients. After you have made your selection press 'List' to generate the report, this report can be printed or exported in a 'CSV' format.

### Debtor Outstanding Invoice Report

This report shows the outstanding invoices for the selected period, i.e. 'Cash' for all cash sales, 'Current', '60 Days' 90 Days' etc.

## List Items on Back Order

You can view all clients with outstanding item that they have purchased and not received.

## List Clients

Account No.	Name	Telephone	Contact	Status
1	CASH SALES			
2	CASH PURCHASES			
3	aaaa			
4	bbbb			
5				

There is three different views that can be selected to list the Creditors

### Short List

Here the Account Number, Name, Telephone Number, Contact Person and Status are displayed.

### Full Listing

With this list the Account Number, Name, Address, Telephone Number and Contact Person are displayed.

### Active Clients by Sales

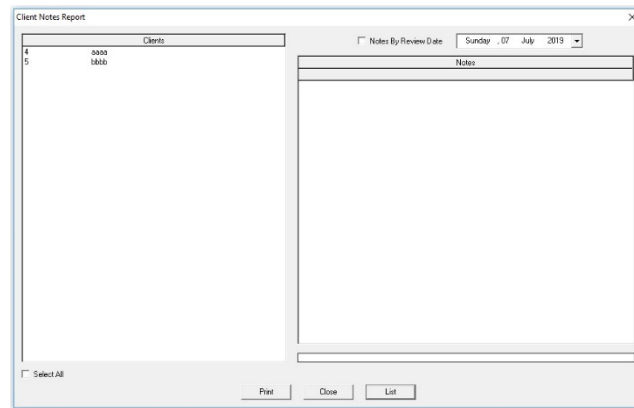

This list is the same as the Short List but only shows clients that have active transactions.

## List Archived Clients

All clients that have been archived are listed here.

Select the report you want from the dropdown list and press list.

## Client Notes Report

The screenshot shows a software window titled "Client Notes Report". It features a "Clients" list on the left with two entries: "4" and "5", each followed by a "+" symbol and the word "notes". To the right of the clients list is a "Notes" section, which is currently empty. Above the "Notes" section is a checkbox labeled "Notes By Review Date" and a date selector showing "Sunday, 07 July 2013". At the bottom of the window, there is a "Select All" checkbox and three buttons: "Print", "Close", and "List".

Clients that have a note inserted can be viewed here, you can select all or a few of the clients to list. If you want to view the clients who's review date is before the date selected, check the 'Notes by Review Date' check box and select the desired date. The client names are shown to view the notes click on the + symbol next to each client. You can print the notes by pressing the 'Print' button, this will open any clients notes that are not open.

# Creditors

## Goods Received

Stock code	Description	Serial Number	Qty	Cost Price	V	% Disc	Total Ex. Val	Selling Price
1								

Before Items can be sold you have to enter them into stock. This is done here.  
There are two ways to load the stock, manual loading each item or by loading a purchase order.

### Load P/O

Number	Date	Total Amount Ex. Val	Acc No	Name
--------	------	----------------------	--------	------

Click on the 'Load P/O' button and select the purchase order you want to load, if you have selected a different client to the one the purchase order was sent to, the client will be changed to the purchase order client. Once the purchase order is loaded you can change the quantity for each item should they have supplied less items than you ordered, the quantity not supplied will be reflected as a back order.

If 'Show selling price' is selected in the preferences you will see the selling price for each item, if 'Allow editing of selling prices' is selected in the preferences you will be able to change the selling price.

If more the one item is purchased and 'User Serial number' is selected for the stock item in the stock capture screen the serial number dialog opens for you to add the serial number for each item.

Press enter to begin entering the serial numbers, when all the numbers are inserted the box will close. If you want to close the box sooner press the 'Esc' key.

### Manual Entry

Select the supplier by pressing 'F2' or from the drop down is or by clicking the 'Supplier' Button.

You can enter stock by entering the stock code in the box or by pressing 'F2' and selecting the item.

The operation is then the same as for Load P/O.

If the Grv is set to manual numbers in the preferences, you will have to enter the GRV number and press the 'Print' key twice. Be careful if the number you have entered exists it will lose the GRV captured and load the GRV with the number.

If you have loaded a purchase order you will not be able to adjust the discount or vat.

## POS Goods Received

The form is titled "(POS) Goods Received Voucher". It contains fields for Client information (Account No., ID Number, Name, Address), Grv No., and Date (09/01/2024). There are buttons for Source, View, and Take Picture. Below this is a table for Items with columns: Stock No., Description, Serial Number, Purchase Amt, and Selling Amt. At the bottom, there are fields for Sub Total, Vat, and Total Amount, along with buttons for GL Posting, Cash Purchase, Close, Clear, and Print.

If 'Treat GRV as Cash Purchase (POS)' is set to 'Yes' in the Creditor preferences you will capture GRV's as purchases from clients as well as suppliers.

Enter the clients account no or ID number in the appropriate field and the client's information will be displayed. You can also press 'F2' and select the client from the client selection list. If the client does not exist enter all the client's details and it will automatically be inserted into the client database.

In POS capture you will only be allowed to capture 5 items per GRV, if more than one item of the same type is purchased you will have to enter each one on a different line. If the item does not exist it will be added to the stock.

Press 'Print' to save the GRV.

## Purchase

The form is titled "Purchase". It contains fields for Client information (Account No., ID Number, Name, Address), Docket No., Date (Tuesday, 09 January), Sales Person, and Method of Payment (EFT). There are buttons for Source, View, and Take Picture. Below this is a table for items with columns: No., Description, Serial Number, Qty, Purchase Price, and Selling Price. At the bottom, there are buttons for GL Posting, Cash Purchase, Close, New, and Print.

Purchases are when you buy items from a person or if you are buying supplies for the office.

Select the creditor by pressing 'F2' or add the persons detail if they are not in the system, this will add them to the system. Enter a items and press Print.

## Goods Returned

The form is titled "GRV / Purchase Credit Note". It contains fields for GR Cr Number, Date (Tuesday, 09 January 2024), Client, Order No., and Purchase No. Below this is a table for items with columns: Stock code, Description, Qty, Price, V, % Disc, and Total Vat Exc. At the bottom, there are fields for Sub Total (0.00), % Discount, VAT, and Total (0.00), along with buttons for GL Posting, Credit Note, New, Close, and Print.

Select the client you want to credit by pressing 'F2' or from the drop down list or by pressing the 'Client' button. Press 'F2' for a list of all the items you have bought from the client or supplier, select the item you want to credit.

When you press 'Print' the stock is decreased by the amounts inserted and all GL transaction will be done.

## Purchase Orders

The screenshot shows a 'Purchase Order Form' window. At the top, there are fields for 'Order Number' and 'Date' (set to Thursday, 27 June 2019). Below these is a 'Supplier' dropdown menu. The main area is a table with columns: Stock Code, Supply Code, Description, Qty, Price, and Total. The table is currently empty. At the bottom right, there are fields for 'Sub Total', 'VAT Index' (set to 1), 'VAT', and 'Total'. At the bottom left, there are buttons for 'Delete', 'New', 'Close', and 'Print'.

If you use manual order numbers you will have to enter the order number and select the supplier by pressing 'F2' or from the drop down list or by clicking the 'Supplier' button, you are going to purchase goods from.

To enter items to be purchased type the Stock Code in the 'Stock Code' column, or you can press 'F2' for the list of stock items. If you type a code in and it does not exist the stock capture screen is displayed and you can enter the details for the item. If your cursor is in the 'Sellers Code' column pressing 'F2' lists the price list for the supplier.

Select the item from there and enter the quantity required. If you don't have a price list for the Supplied items, enter the supplier stock code manually if you know it.

The item will be added to the supplier price list.

If the purchase is non vatable select the non-VAT index from the drop down list.

Once all the items have been entered press 'Print' to print the order form and save it.

## Bulk Purchase Orders

The screenshot shows a 'Bulk Purchase Order' window. It has fields for 'Order No' and 'Date' (set to Thursday, 27 June 2019). Below these is a table with columns: Code, Description, On Hand, ReOrder Level, Sales Back, Goods On Order, and No to Order. The table is currently empty. At the bottom, there are buttons for 'Close', 'Update', and 'Print'.

Purchase orders can be captured in bulk, the limitation with this method is that suppliers cannot be selected, a list is printed whereby you can order from each supplier. Enter the amount to order for each item, if you are using 'manual purchase order numbers' you will have to insert the order number in the 'Order No' box, press 'Update' to save the form and 'Print' to print it.

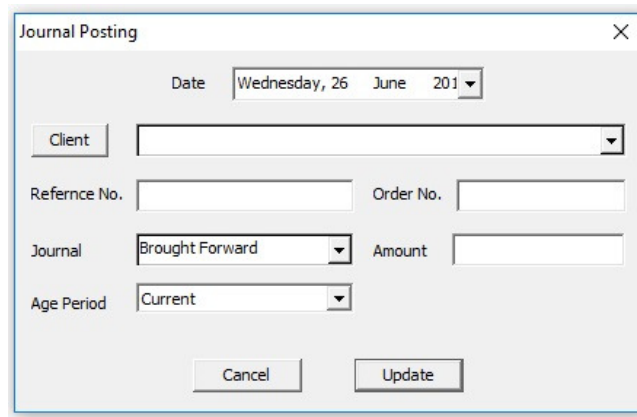

### Bulk Journal Posting

Bulk Journal Posting is used to update the General Ledger for your Creditors you pay monthly, Water and Lights for example.

To add the accounts you used 'Journal Posting (Creditors)' under the 'General Ledger' menu. You must set each item as an Invoice 'IN' short code.

The list of all the GL items marked as 'IN' will be displayed, where you can enter the amount for each one. Press 'Update' to save the GL transactions.

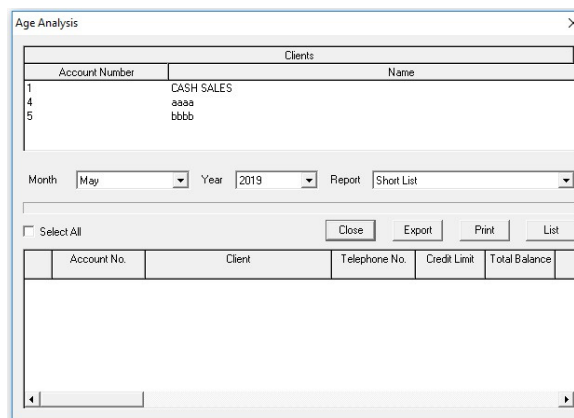

## Journal Posting

Select 'Journal Posting' from the 'Creditors' menu to enter transactions.

Select the creditor you want to enter journal entries for. Select the date for each transaction and enter the reference, order no and select the Journal to post to from the drop-down list 'Journal'. If the Age Period is needed, it will be shown, select the period to enter to. Enter the amount and click 'Update' to insert.

## Age Analysis

Select the suppliers you want to view and press 'List' or press the 'Select All' check box to select all the suppliers. An age analysis can be printed for the month selected, all outstanding amounts will be shown ending on the end of the selected month.

There are 3 reports that can be done:

[Short List](#)

Only creditor outstanding balance and aging are shown.

[Detailed List](#)

This shows all outstanding balancer as well as all transactions done until the end of the month selected, and all ageing are shown.

[Purchase to Date](#)

This report shows each creditor month to date purchases, month's profit, and year to date purchases, year to date profit and the current balance and total balance for the selected month.

You can print this report or export the report by selecting the appropriate button.

## Creditor Enquiries

Date	Reference	Order No	Debit	Credit	Balance
------	-----------	----------	-------	--------	---------

Select the client you are going to do the enquiry for, a list of all the transactions for the current period are displayed. By double clicking on the item in the list the details for that transaction are shown. Clicking the 'GL Audit' button displays a list of all the GL transactions for the selected item.

If 'GRV' is pressed the Grv or Grv credit note for the item is displayed.

By double clicking on the item in the list the details are shown.

## Search Creditor History

Date	Type	Reference	Order No	Debit	Credit	Balance
------	------	-----------	----------	-------	--------	---------

Select the Creditor and a list of all the transactions are displayed. To view the actual transaction select the item and press 'Document'. If there are a lot of items in the list you can insert the reference text in the 'Search' box and press the 'Search' button this will list the item.

## Creditor Administration

Client List	Account No	Name	Title	ID Number	Postal Address	Delivery Address	Telephone	Fax	Cell	E-Mail Address	Contact	VAT No.	Registration No.	Acc. Type	Brought Forward	Sell Price	Retail	Terms	Cash	Credit Limit	Discount	Interest Rate	Bank Name	Bank Account No	Region	Bank Branch Code	Status	On Hold	List Archived Clients
-------------	------------	------	-------	-----------	----------------	------------------	-----------	-----	------	----------------	---------	---------	------------------	-----------	-----------------	------------	--------	-------	------	--------------	----------	---------------	-----------	-----------------	--------	------------------	--------	---------	-----------------------

Creditor details can be edited here or new creditors captured.

To edit a creditor select the creditor from the list and change the details. A new creditor can be entered by clicking the 'New' button and entering the details, the creditor name and account number must be entered.

### Region

Each creditor can be assigned a region for reporting.

## Hold

If the creditor is to be put on hold the 'Hold' check box is checked and a supervisor will have to authorise any transaction done on the creditors account.

## Acc. Type

The way invoices are selected to do receipts / journal entries for the creditor is selected here, there are two ways receipts / journal entries is done.

'Brought Forward' here the earliest to the latest invoice is marked paid up.

Open Item where you have to select each invoice to receipt or a journal entry to be done against it.

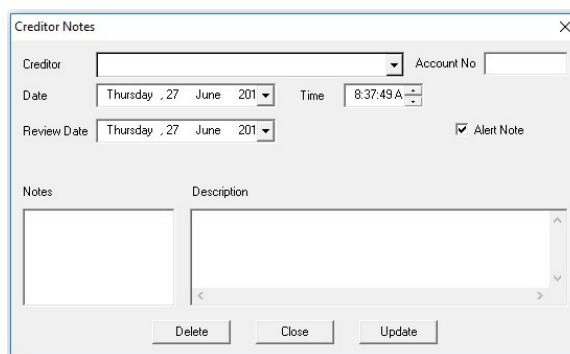

## Terms

This is the period you have to pay the creditor.

## Status

This is an indicator used in reporting to show the status of the creditor, you can type anything in here.

## Creditor Notes

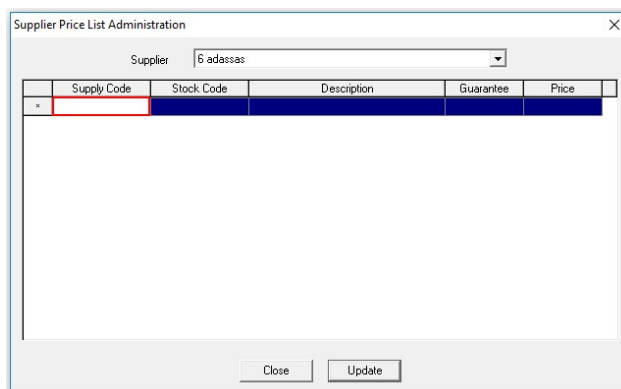

Notes can be inserted for any creditor used as an alert when doing creditor transactions.

Select the creditor and enter the date and review date if you want to check the action at a later date. If you want an alert click on the 'Alert Note' check box. To print the note on the client's statement click the 'Inc. statement' check box.

If more than one note is selected for the alert or statement printing, the last note entered will be displayed.

Notes can be multi-line notes but can only have 255 characters.

## Supplier Price list Administration

The supplier price list is used when purchase orders are captured. Select the supplier from the drop down list and enter the details for each item or edit the existing items. Press 'Update' to save the supplier's price list.

## Reports

## List Goods in Back Order

Item No.	Client	Description	Date	Time	Qty	Price	Discount	Total	Purchase No.	Sales Person
----------	--------	-------------	------	------	-----	-------	----------	-------	--------------	--------------

When Purchase Orders are brought into stock through the GRV, the supplier might have supplied less items that ordered. These items are added as back order goods. The items on back order can be viewed here. You can view all goods ordered from suppliers and not received.

## Goods Received for a Period

Item No.	Client	Description	Date	Time	Qty	Price	Discount	Total	Purchase No.	Sales Person
----------	--------	-------------	------	------	-----	-------	----------	-------	--------------	--------------

All items bought between the selected periods are shown with this report. Select the date from and date to list the items. You can print or export the report in 'CSV' format.

## List Creditors

	Account No.	Name	Telephone	Contact	Status
1		CASH SALES			
2		CASH PURCHASES			
3		aaaa			
4		bbbb			
5					

There is three different views that can be selected to list the Creditors

### Short List

Here the Account Number, Name, Telephone Number, Contact Person and Status are displayed.

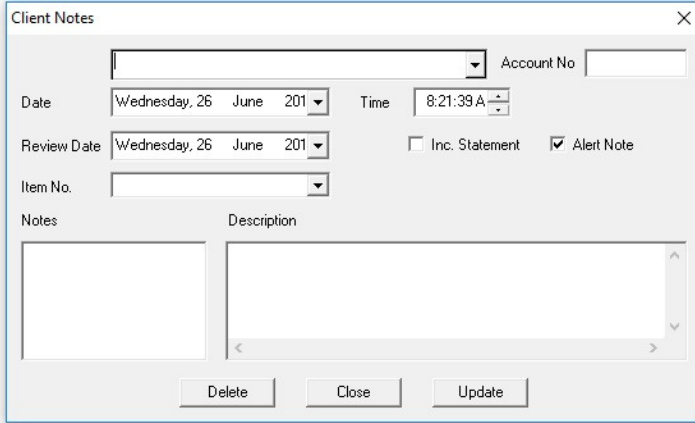

### Full Listing

With this list the Account Number, Name, Address, Telephone Number and Contact Person are displayed. Select the report you want from the drop down list and press list.

### Active Creditors by Purchase

This list is the same as the Short List but only shows creditors that have active transactions.

## Creditor Notes Report

The 'Client Notes' window contains the following elements:

- Search Fields:** A dropdown menu for selection, an 'Account No' text field, a 'Date' dropdown (Wednesday, 26 June 201), and a 'Time' dropdown (8:21:39 A).
- Filters:** A 'Review Date' dropdown (Wednesday, 26 June 201), an 'Inc. Statement' checkbox (unchecked), and an 'Alert Note' checkbox (checked).
- Item Selection:** An 'Item No.' dropdown menu.
- Data Table:** A table with two columns: 'Notes' and 'Description'. The table is currently empty.
- Buttons:** 'Delete', 'Close', and 'Update' buttons at the bottom.

Creditors that have a note inserted can be viewed here, you can select all or a few of the creditors to list. If you want to view the creditors who's review date is before the date selected, check the 'Notes by Review Date' check box and select the desired date. The creditor names are shown to view the notes click on the + symbol next to each creditor. You can print the notes by pressing the 'Print' button, this will open any creditor notes that are not open.

# Stock

## Stock Administration

Stock Description Capture

Stock Code:

Description:

Serial:

Department:

Retail Calculation:

Bin:

Unit Cost:  Packet Size:

Retail Markup:  Retail Price:

Wholesale Markup:  Wholesale Price:

Alt Markup:  Alt. Price:

Re - Order Level:  Re - Order Qty:

Weight:

☒ Store Serial No.  
☐ No Barcode Printing

Delete Edit S/No. New Close Update

Before stock can be inserted into the system the stock item details need to be inserted.

Select 'Stock Administration' from the 'Stock' menu to enter the capture screen.

There are three descriptions in the 'Stock' Preferences that can be used to record stock details, the second description is used for the item serial no, the other two can be any name you give it.

When entering the stock code the code is checked to see if the item exists, if so the item details can be edited.

There are 3 selling prices for each item, Retail Price, Wholesale Price and Alt Price, you select the method of calculation from the 'Retail Calculation' drop down box.

These prices if calculated is based on the cost price of the items, the cost price is stored in a table when an item is purchased, the table can hold 5 cost prices and the prices are inserted in a first in first out principle that is the 6th time an item is bought the 1st time that was purchased, it's price is dropped.

There are 4 different calculations for the stock items retail price, these are :

Manual Charge The items price will have to be inserted for each price category.

% Mark-up on Average Cost There the average of the 5 cost price structure is used when the selling price is calculated.

% Mark-up on latest Cost The selling price is changed to the calculation of the cost price when new stock is inserted.

% Mark-up on Highest Cost The highest cost from the cost price structure is used for the calculation.

If the 'Store Serial No.' is selected when capturing the stock description the serial numbers for the item will have to be inserted when new stock is captured. If you are editing an existing item that has been purchased you can edit these serial numbers by pressing the 'Edit S/N' Button.

Enter the serial number for each item, the Date Inserted column is the date that the item was captured into stock, you can also edit the date.

When finished press the 'Update' button to save the changes and exit.

## Stock Enquires

The 'Stock Enquires' dialog box contains several input fields for stock details. On the left, there are fields for 'Code', 'Description', 'Serial Number', 'On purchase Order', 'Average Cost', and 'Retail Price'. On the right, there are fields for 'Opening Stock', 'Purchases', 'Sales', 'Current Stock', and 'Department'. In the center, there are fields for 'On Sales Order', 'Latest Cost', and 'Last Sales Date'. Below these fields is a table with columns: Date, Code, Reference, Sales Rep, Discount, Profit, Qty, and Amount. At the bottom of the dialog are four buttons: 'History', 'Costs', 'Close', and 'Print'.

Select 'Stock Enquires' from the 'Stock' menu to view the dialog.

Type in the stock code you want to view or press 'F2', (Function key 2), to access the stock list and select the item from the list.

The items details will be displayed. If you click on the 'History' key or type 'Alt H' the movement of the item for the current year will be displayed. If the 'Cost' button is pressed or 'Alt C' keys selected the cost structure is displayed for the item. This structure is updated every time more items are inserted into sock.

The structure works on a first in first out principle, the selling price is calculated from this structure.

## Stock Take Administration

The 'Stock Take Administration' dialog box features a 'Sort' dropdown menu set to 'Code' and a 'Department' dropdown menu set to '\_ALL\_'. Below these is a table with columns: Adj, Code, Dept. Code, Description, Serial Number, Size, Cost, On Hand, Physical Stock, Difference, and Misc. At the bottom of the dialog are four buttons: 'Export', 'Adjust Stock', 'Close', and 'Print'.

When stock needs to be counted a list of items and there location and current amount in stock can be printed.

The list can be sorted by the selecting the sort column from the drop down list.

After the stock has been counted the stock can be adjusted by entering the new amount into the 'Physical Stock' column and clicking on the 'Adj' check box to tell the system to adjust the selected item.

After all the items have been entered click 'Adjust Stock' to update the system.

## Bulk Stock Editor

	Code	Description	Serial Number	Cost	Price
1	A001	Bolts		400.000	500.00

If you select 'Stock Editor' from the 'Stock' menu item you can edit the current cost, selling price and description of stock items.

Enter the data for each item to be edited and press 'Update' to save the data.

## Lay-By / Deposit Administration

Item Code	Description	Serial Number	Status	Cost Price	Sales price	Amount Deposited
-----------	-------------	---------------	--------	------------	-------------	------------------

When a client wants to pay for an item in instalments before they purchase the item, it is captured here.

Enter the account number and the client's information will be displayed. If it is a new client enter the information for the client and the client will be entered into the system.

You can use the clients account number or Id number to select the client or you can press 'F2' and select the client from the list.

After you have selected a client a list of all lay-by's for the client is displayed for you to select the one you want to add another payment to. If it is a new lay-by press 'Cancel' to close the screen.

For a new lay-by enter the stock code for the item and press 'Enter', the item's details are shown, enter the amount to hold against the item and the selling price if needed, the selling price is changed for the stock item. Press 'Print' to save. If Lay-By mark-up is used and setup in the Lay-by preferences its value will be displayed on the screen, this amount is calculated for each month until the person purchases the item.

## Lay-By / Deposit Credit Note

Item Code	Description	Sales price	Credit
-----------	-------------	-------------	--------

The lay-by credit note is captured the same way the lay-By was captured.

## Reports

### Stock Lists

There are 4 different lists that can be displayed.

#### Retail Price List

This list displays the stock code, description and retail prices.

#### Full Listing

The full details for each item is displayed.

#### Item Code & Description

This list displays the stock code, description, department and packet size.

#### Total Stock Value

This displays the total cost of all the stock items.

Select the type of list from the 'List' drop down box.

Select the 'Cost Price' from the drop down box if you want to display a specific cost price.

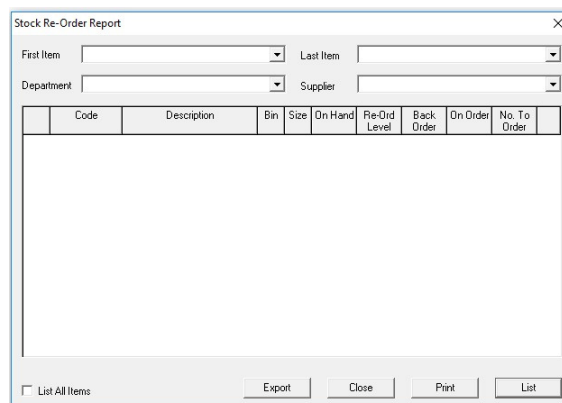

Select the 'Retail Price' from the drop down box if you want to display a specific retail price.

You can select a date to be searched for or all items before or after a date by selecting the method of calculation from the drop down box next to the date selector. You can also select a specific supplier.

Press 'List' to list the report and 'Print' to print the report after you have listed it.

You can also export the report as a CSV file to be opened in Excel.

### Stock Re-Order List

You can print a list of all item that need to be reordered when there levels have fallen below the reorder level captured in the Stock Administration screen.

The options for this report are :

You can select a code from and code to which displays all the items between the codes and the codes themselves.

You can select a certain department or supplier to list.

Pressing 'List' to generate the report.

Press 'Print' to print the report after you have listed it.

You can also export the report as a CSV file to be opened in Excel.

## Daily Analysis

Stock Code	Description	Sales	Units	Cost	Average Markup	Profit	MTD Sales
------------	-------------	-------	-------	------	----------------	--------	-----------

Select the period to view and press 'List'. The report shows the profit for the items as well as Mount to Date information.

Press 'Print' to print the report after you have listed it.

You can also export the report as a CSV file to be opened in Excel.

## Items with Deposits / Lay-By Transactions

Item Code	Description	Date	Amount	Client Account No	Client Name
-----------	-------------	------	--------	-------------------	-------------

This report shows all the items that have a deposit / lay-by against them for the period selected.

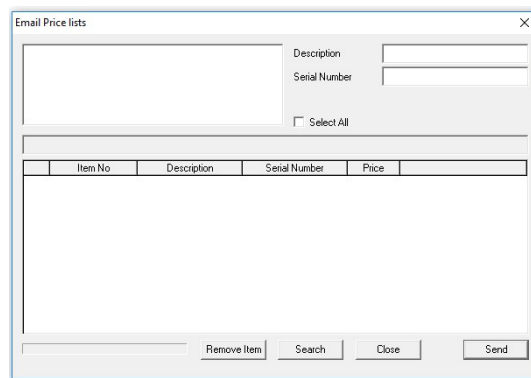

## Search Stock

Item Code	Description	Serial Number	Serial Number	Name	ID Number
-----------	-------------	---------------	---------------	------	-----------

Stock can be searched by entering any of the search fields. The fields do not have to be the full name etc. Search will find any item with the data inserted.

## E - Mail Price Lists

The 'Email Price lists' dialog box contains three input fields for 'Description' and 'Serial Number'. Below these is a checkbox labeled 'Select All'. A table with columns 'Item No', 'Description', 'Serial Number', and 'Price' is shown. At the bottom are buttons for 'Remove Item', 'Search', 'Close', and 'Send'.

Item No	Description	Serial Number	Price
---------	-------------	---------------	-------

Price lists can be e-mailed to any client that has a valid email address inserted when you captured the client. You can list all stock items by leaving the 3 description boxes blank and pressing 'Search', or you can enter a word or part of a word in any of the 3 boxes and when you press 'Search' only those items containing the word will be displayed. You can remove item from the list before sending by selecting the item and pressing 'Remove Item'. To send the list to all your listed clients press 'Select All' or select each client you want the list to go to in the client list box.

Press 'Send' to email the items.

Note : You must have a valid mail server address in your preferences as well as a email address for your company. You will also need a internet connection.

## Print Barcode Labels

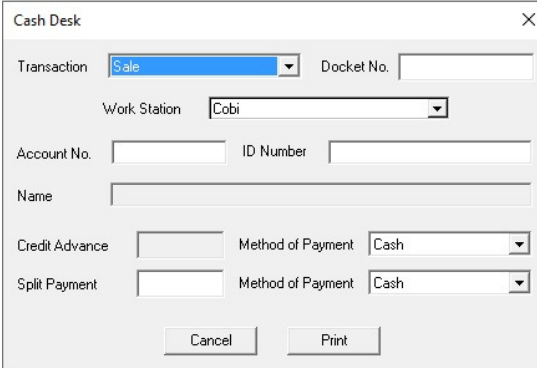

The 'Print Barcode Labels' dialog box has input fields for 'Code' and 'Selling Price'. Below them is a field for 'Number of labels' with the value '1'. At the bottom are 'Close' and 'Print' buttons.

Barcode labels can be printed manually by entering the code for the item, the selling price if you have 'Show Selling Price on Label' in the preferences set to 'Yes'. Enter the number of labels you want to print and press 'Print'.

# General Ledger

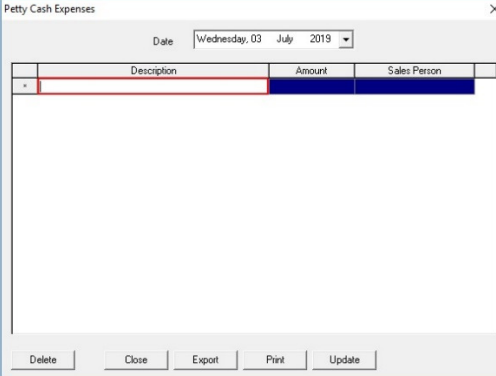

## Cash Desk

The 'Cash Desk' window is a form for recording transactions. It includes fields for Transaction (a dropdown menu with 'Sale' selected), Docket No., Work Station (a dropdown menu with 'Cobi' selected), Account No., ID Number, Name, Credit Advance, Method of Payment (a dropdown menu with 'Cash' selected), Split Payment, and another Method of Payment (a dropdown menu with 'Cash' selected). At the bottom are 'Cancel' and 'Print' buttons.

A cash desk can be used if you want a single person to give out cash and receive cash. Select the transaction from the dropdown list and insert the docket number, this will show how much needs to be given or paid depending on the transaction. If the transaction is a Pawn Redeem, Extension or a sale the Split payment box will display where you can split the payment between 2 different payment options. Press Print to print a receipt.

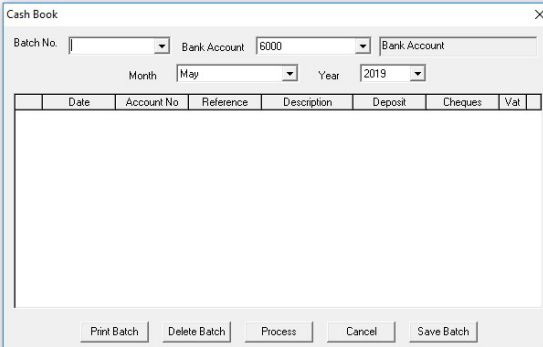

## Petty Cash Expenses

The 'Petty Cash Expenses' window shows a table for recording expenses. The table has columns for Description, Amount, and Sales Person. The Date is set to Wednesday, 03 July 2019. At the bottom are buttons for Delete, Close, Export, Print, and Update.

This is the expenses incurred by the company every day.  
Enter the description, amount and select a salesperson if needed.  
You can print the list or export it into Excel.

## Cash Book

The 'Cash Book' window is a form for recording cash transactions. It includes fields for Batch No., Bank Account (a dropdown menu with '6000' selected), Month (a dropdown menu with 'May' selected), and Year (a dropdown menu with '2019' selected). Below these fields is a table with columns for Date, Account No., Reference, Description, Deposit, Cheques, and Vat. At the bottom are buttons for Print Batch, Delete Batch, Process, Cancel, and Save Batch.

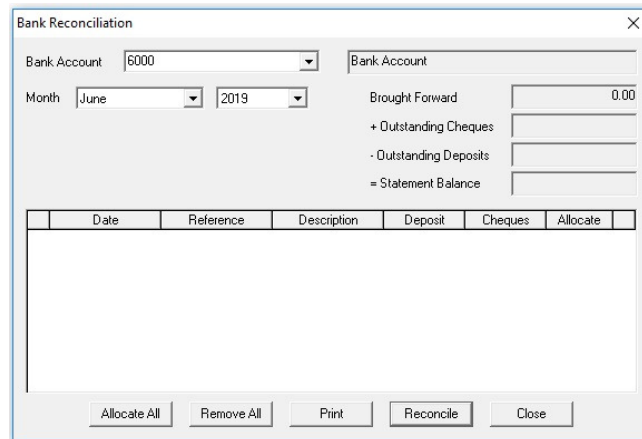

Select the bank account no you are going to post deposits or cheques to from the dropdown list. Enter the batch number and press 'Enter' or 'Tab'.

Select the period you want to work in, batches can be captured for any period in the current year.

Select the date for each transaction, select the account you are going to debit or credit, enter a reference and the amount in the appropriate column, select the VAT amount if vat is applicable. If the 'Debtors Receipts Clearing' or 'Accounts Payable' accounts are selected you are prompted to select the Receipt or payment from the list displayed.

Press 'Save' to save the batch, if this is done you will be able to edit the batch before allocating it. To allocate the batch to the cash book press the 'Allocate' button or hold down the 'Alt' key and press the 'A' key. To edit a batch enter the batch number in the edit box and press 'Enter' the batch will then be loaded and you will be able to edit the transactions. If you list a batch that has been posted you will not be able to edit it.

## Bank Reconciliation

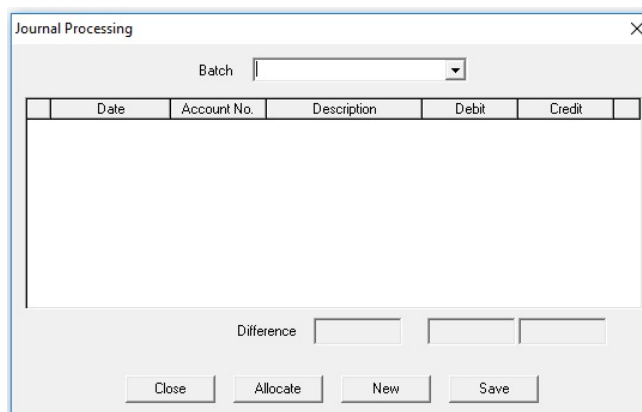

The 'Bank Reconciliation' window contains the following elements:

- Bank Account:** A dropdown menu currently showing '6000'.
- Month:** A dropdown menu showing 'June'.
- Year:** A dropdown menu showing '2019'.
- Summary Section:**
  - Bank Account:** A text field.
  - Brought Forward:** A text field showing '0.00'.
  - + Outstanding Cheques:** A text field.
  - Outstanding Deposits:** A text field.
  - = Statement Balance:** A text field.
- Table:** A table with columns: Date, Reference, Description, Deposit, Cheques, Allocate. The table is currently empty.
- Buttons:** 'Allocate All', 'Remove All', 'Print', 'Reconcile', and 'Close'.

Select the bank account no you want to reconcile from the dropdown list, select the month, year and enter the batch number. The balance brought forward and outstanding debits and credits will be shown, a list of all the transactions will be shown. You can allocate all the un-allocated transaction by pressing the 'Allocate All' key or select each one individually by clicking on the check box in the allocate column. To un-allocated transactions click the check box again or if you intend to un-allocate all the transactions press the 'Un-allocate All' button. Save the batch by pressing 'Reconcile'. You can print a report by pressing 'Print'.

## Journal Processing

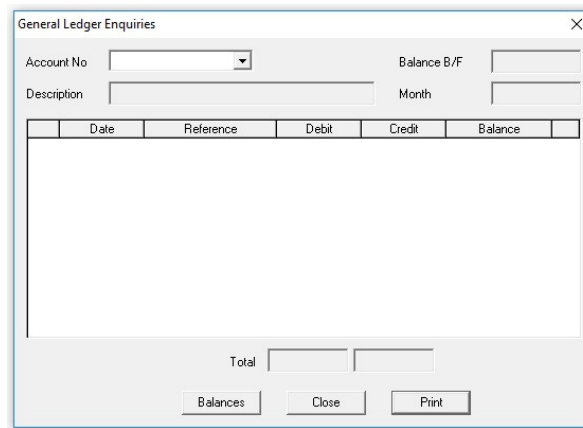

The 'Journal Processing' window contains the following elements:

- Batch:** A dropdown menu.
- Table:** A table with columns: Date, Account No., Description, Debit, Credit. The table is currently empty.
- Difference:** A text field.
- Buttons:** 'Close', 'Allocate', 'New', and 'Save'.

Journal processing can be done in batches then saved, you can then edit these batches and when you are satisfied allocate them. Only the current months batches are loaded if you want to view a previous month change the system date under the 'Administration' menu.

Enter a batch number or press 'New', if no Batch number is inserted the system will allocate a number for you. If the batch exists the items will be displayed and you will be able to edit them if they have not been allocated. You can select the date, account no, description, debit or credit amount for the transaction. You will need to do a contra transaction or transactions that returns a balance of zero before the system will save or allocate the batch. To allocate the batch press the 'Allocate'.

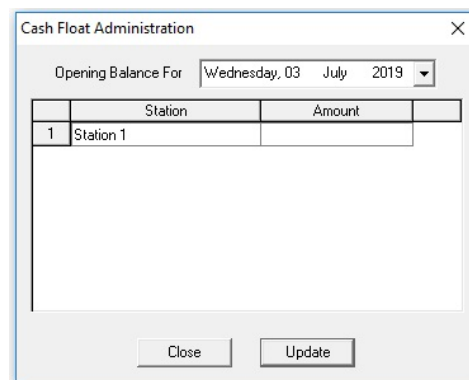

## Ledger Enquires

The 'General Ledger Enquiries' window features a title bar with a close button. It contains two input fields: 'Account No' with a dropdown arrow and 'Balance B/F' with a text box. Below these are 'Description' and 'Month' text boxes. A large table area is present, with a header row containing columns: Date, Reference, Debit, Credit, and Balance. At the bottom, there is a 'Total' label followed by two empty text boxes, and three buttons: 'Balances', 'Close', and 'Print'.

Select the ledger account from the dropdown list box and all entries done for the current month will be listed. To see the balances for the current year click the 'Balance' button and the list will be displayed. Clicking the 'GL Audit' button displays a list of all the GL transactions for the selected item.

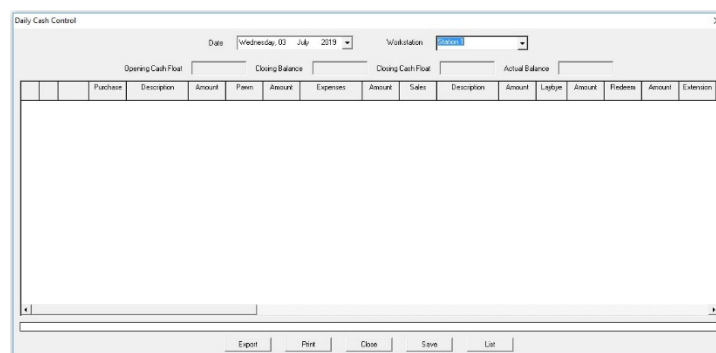

## Cash Float Administration

The 'Cash Float Administration' window has a title bar with a close button. It includes an 'Opening Balance For' dropdown menu currently showing 'Wednesday, 03 July 2019'. Below this is a table with two columns: 'Station' and 'Amount'. The first row shows '1' in the 'Station' column and an empty 'Amount' cell. At the bottom are 'Close' and 'Update' buttons.

You can enter the cash float each workstation needs at the start of the day, when you run the daily cash up the new amount will automatically be inserted for the next day.

## Daily Cash Control

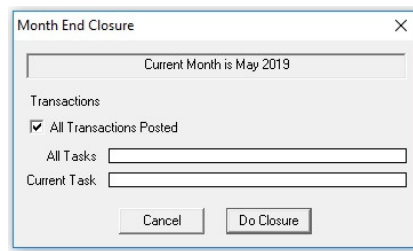

The 'Daily Cash Control' window features a title bar with a close button. It has a 'Date' dropdown (showing 'Wednesday, 03 July 2019') and a 'Workstation' dropdown (showing 'Account'). Below these are four text boxes: 'Opening Cash Float', 'Closing Balance', 'Closing Cash Float', and 'Actual Balance'. A large table area follows, with a header row containing columns: Purchase, Description, Amount, Paid, Amount, Expenses, Amount, Sales, Description, Amount, Left, Amount, Problems, Amount, and Extension. At the bottom are 'Export', 'Print', 'Close', 'Save', and 'List' buttons.

Use this report to do the cash up for each workstation every day to make sure the cash balances to all the transactions done for that day.

It shows how much cash is left in the till as well as the balance of all transactions. When you are happy with the result press 'Save' to save the cash float to the next day.

## Month End Closure

Month End Closure

The chart of account setup dialog is used to enter new control accounts. the accounts in red are reserved accounts they cannot be deleted, you can change the name of the account for your reports. Click on a empty line and insert the data, or edit an existing account. Accounts can only be deleted if they have a zero balance. To delete a account select the account in the list and press the 'Delete' button. To save the list press the 'Update' button.

## Journal Posting Setup (Debtors)

[illegible]

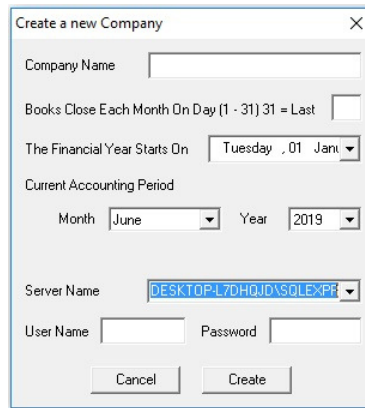

Posting can be done against any clients account, the way the transactions are posted are setup here, the description and a short code must be entered, if the control account is debited or credited must be selected, if the transaction has vat check the vat check box. The sales commission can be debited or credited by the transaction if the check box is checked. The control account to use must be selected. These posting types are used when you do journal posting under the 'Debtors' menu.

## Journal Posting Setup (Creditors)

This setup is the same as the Debtors setup above but is used when the journal posting is done under the 'Creditors' menu.

## Create a new Company

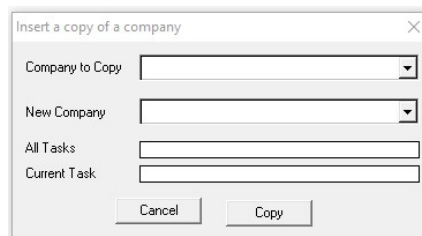

The 'Create a new Company' dialog box contains the following fields and controls:

- Company Name: Text input field.
- Books Close Each Month On Day (1 - 31) 31 = Last: Check box.
- The Financial Year Starts On: Dropdown menu showing 'Tuesday', '01', 'Jan'.
- Current Accounting Period: Section with 'Month' (June) and 'Year' (2019) dropdowns.
- Server Name: Dropdown menu showing 'DESKTOP-L7DHQJD\SOLEXP'.
- User Name: Text input field.
- Password: Text input field.
- Buttons: 'Cancel' and 'Create'.

You can create new companies as needed, the defaults must be set for the company, if you want to use the defaults from an existing company select the company from the 'Create using defaults from' drop down list. Select the Database from the drop down list and enter the user name and password for the database. The default database and user name password are displayed for you current setting.

## Copy a Company

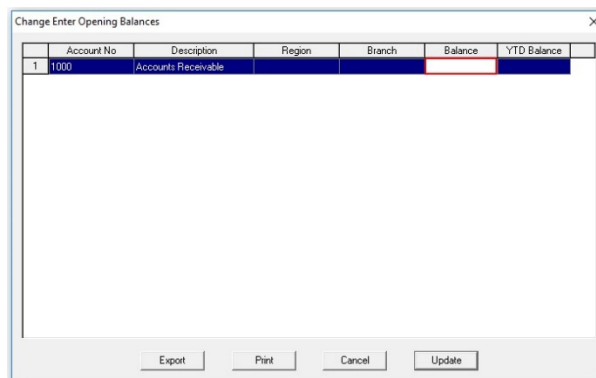

The 'Insert a copy of a company' dialog box contains the following fields and controls:

- Company to Copy: Dropdown menu.
- New Company: Dropdown menu.
- All Tasks: Text input field.
- Current Task: Text input field.
- Buttons: 'Cancel' and 'Copy'.

Your company can be copied to a new database here by selecting the database to copy and the name of the new company. A new company must first be created with 'Create a new Company' under the General Ledger Setup menu.

## Enter Opening Balances

The 'Change Enter Opening Balances' window displays a table with the following data:

	Account No	Description	Region	Branch	Balance	YTD Balance
1	1000	Accounts Receivable				

At the bottom of the window are buttons for 'Export', 'Print', 'Cancel', and 'Update'.

When you take on a company from a different system you will have to enter the current balances for the corresponding GL accounts in the old system, the current totals can also be edited here.

## Assert Register

### Asset Register Administration

The 'Asset Register Administration' dialog box contains the following fields and controls:

- Asset Code: Text input field
- Description: Text input field
- Branch Code: Text input field
- Region: Dropdown menu
- Purchase Date: Date picker (Thursday, 27 June 2019)
- Write Off Date: Date picker (Thursday, 27 June 2019)
- Purchase Price: Text input field
- Depreciation Type: Dropdown menu (Straight Line method)
- Depreciation Rate: Text input field
- Initial Depreciation: Text input field
- Accum. Depreciation Account: Dropdown menu
- Depreciation Account: Dropdown menu
- Finance Bank: Dropdown menu
- Reference: Text input field
- Est. Trade in Value: Text input field
- Buttons: Close, Update

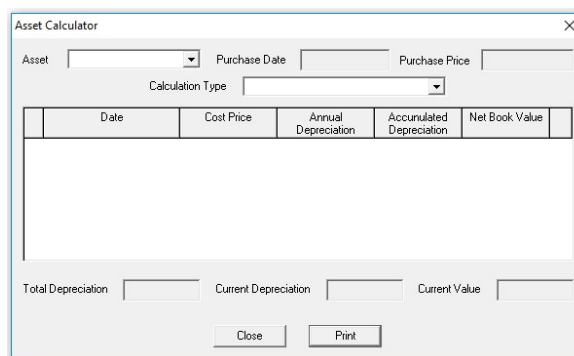

Insert the code for the asset you would like to enter or edit, if the asset exists the information for the item will be displayed. Enter the details for the asset and select the method of depreciation, these can be:

- Straight Line method
- Reducing balance method
- Sum of years digits method.

Select the accumulated depreciation control account and the depreciation control account where the depreciation will be stored. If these accounts have not been captured you will have to insert them in the 'Chart of Accounts' editor.

Click 'Update' to save the information and 'Close' to exit.

### Asset Calculator

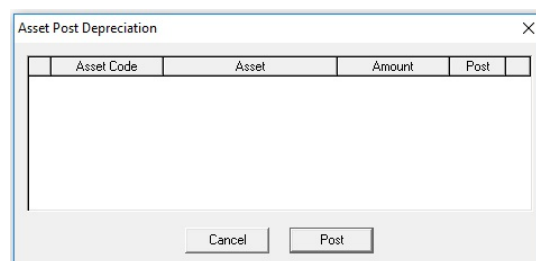

The 'Asset Calculator' dialog box contains the following fields and controls:

- Asset: Dropdown menu
- Purchase Date: Date picker
- Purchase Price: Text input field
- Calculation Type: Dropdown menu
- Table with columns: Date, Cost Price, Annual Depreciation, Accumulated Depreciation, Net Book Value
- Total Depreciation: Text input field
- Current Depreciation: Text input field
- Current Value: Text input field
- Buttons: Close, Print

Select the asset from the drop down box and select the type of calculation to view the depreciation for each year.

The current depreciation is also shown.

### Post Depreciation

The 'Asset Post Depreciation' dialog box contains the following fields and controls:

- Table with columns: Asset Code, Asset, Amount, Post
- Buttons: Cancel, Post

At the end of your fiscal year you can post the assets depreciation to the GL, select each asset by checking the check box in the 'Post' column of the list.

Press 'Post' to insert the checked items in the GL.

# Pawn Management

## Pawn capture

The screenshot shows the 'Pawn Goods' window. At the top, there's a date field set to 'Tuesday, 05 January 2024' and a time field '10:09:58 AM'. A 'Docket No.' field is empty. Below these is a 'Client' field and a 'Department' dropdown menu set to 'Back Shop'. A table with columns 'Item No.', 'Description', 'Serial Number', 'Qty', 'Amount', 'Total', 'Repayment', and 'Bin' is present. At the bottom, there are fields for 'Interest %' (25.00), 'Service Charge' (0.00), 'Total', 'Date Due' (Tuesday, 16 January), 'Total Due', and 'Inc. Service Charge'. A 'GL Posting' button is labeled 'Pawn'. A row of buttons at the very bottom includes 'New', 'Source', 'View', 'Take Picture', 'Close', 'Update', and 'Print'.

You can press the button bar for pawn goods, or from the 'Pawn' menu select 'Pawn Capture', or press Function Key 'F6'.

Press 'New' to start entering a new pawn docket. If you have selected manual dates in the program preferences then you will have to select the date, the due date is automatically calculated from the date entered and is calculated from the date pawned plus the amount of days inserted in the 'Days before pawn expires' preferences. The pawn docket number can be inserted manually or by the program depending on how you set the program preference. If you insert the Docket number manually the item numbers take the docket number and append an '1...2..3..' to the item number.

EG: 11112

Press the 'Client' button to select the client or add new clients to the database.

### Entering Clients

To select the client you can press 'F2', (Function Key 2) and select the client from the list. You can also select the client from the drop down list box in the pawn capture screen, another way is to click on the 'Client' button and select the client from the list, and this way you can add or edit the client details by selecting the client to edit and clicking on the 'New/Edit' Key. When you are in the client select dialog pressing 'F2' will allow you to enter a new client.

### Inserting the Items

Enter each item into the list of items inserting the description, serial no if applicable, quantity and amount. If you keep entering on the same line the line moves to the left and you will be able to select the bin in the shop for the item. A quicker way of selecting the bin is to type the letters for the bin and this will cause the first item with the spelling to display, press 'Enter' and that area or place will be selected.

Once you have entered all the items you can select the department for the items if the shown department is not correct. If the items in the list have different departments you will have to make a different pawn docket for each department.

The default interest rate is shown but you can change this for this docket by inserting the amount you want.

Press the 'Update' key to save the data or type 'Alt U'.

## Pawn Credit Notes

The screenshot shows the 'Pawn Credit Note' window. At the top, there's a date field set to 'Friday, 28 June 2019' and a time field '8:26:52 AM'. A 'Credit Note No.' field is empty. Below these is a 'Client' field and a 'Reason' dropdown menu set to 'General Credit'. A table with columns 'Item No.', 'Description', 'Serial Number', 'UserDesc1', and 'Amount' is present. At the bottom, there are buttons for 'GL Posting', 'Pawn Credit', 'New', 'Close', 'Print', and a 'Total' field.

Pawn credit notes are used to credit an item that has been incorrectly inserted.

To select the client to be credited you can press 'F2', (Function Key 2) and select the client from the list. You can also select the client from the drop down list box in the invoice screen, another way is to click on the 'Client' button and select the client from the list, and this way you can add or edit the client details by selecting the client to edit and clicking on the 'New/Edit' Key.

Once the client has been selected pressing the 'F2', key will list all the stock items where you can select the item been sold. Press the 'Tab' key or 'Enter' Key to move across the grid to Amount column where you can enter the amount to credit, press 'Enter' again and you will be moved to a new line where the next item can be inserted. Select the reason for the credit note from the drop down box. Once all items have been captured press the 'Esc' key to leave the stock grid and click on the 'Print' button to save and print the credit note or you can type 'Alt P'.

### Reprinting Credit Notes

Should you have to reprint a credit note you can type the number of the credit note in the credit number box and the credit note will be displayed for printing, click on the 'Re-Print' button and select your print and a copy of the credit note will be printed.

### Pawn Credit Note Reason Administration

Reason	
1	General Credit
2	Stolen Item
3	

Buttons: Delete, Close, Update

These are the reasons for pawn credit notes.

Select 'Pawn Credit Note Reason Admin.' from the 'Pawn' menu item.

Click on the position in the list where you want to enter or edit the reason. Click 'Update' to save the list or select the reason you want to delete and click the 'Delete' button.

### Pawn Redeems

Client: \_\_\_\_\_ Pawn Docket No.: \_\_\_\_\_

Item No.	Description	Serial Number	Amount Given	Interest Due	Total	Payment

Buttons: GL Posting, Pawn Redeem, Close, Redeem

Service Charge: \_\_\_\_\_ Total Due: \_\_\_\_\_ Amount to Insert: \_\_\_\_\_

Select 'Pawn Redeem' from the 'Pawn' menu or click the 'Pawn Redeem' button bar to enter data or press Function key F7.

Insert the pawn docket number in the Pawn Docket No. field or select the number by clicking on the down arrow, the pawn items will be displayed showing the capitol given, how much interest is due and the total for each item. Insert the amount for each of the items to redeem or you can redeem all the items by inserting the amount in the 'Amount to Insert' box. If the client is only paying the interest insert this amount and the item will be extended for a new period.

Press the 'Update' button to save the data.

Point of sale (POS)

# Service Management

## Client Equipment Administration

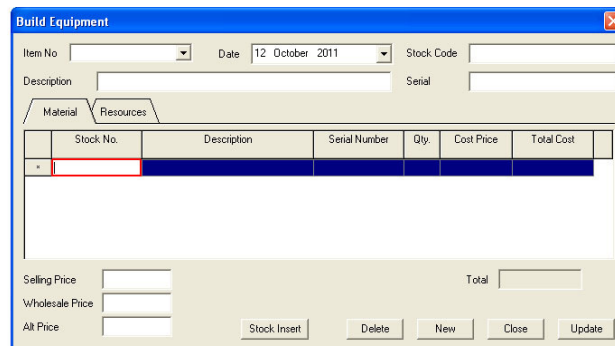

The 'Client Equipment' window features a title bar with a close button. Below the title bar, there are two input fields: 'Account No' and 'Client'. The 'Client' field is a dropdown menu. Below these fields is a table with the following columns: Name, Model, Serial No, Installation Date, Purchase Price, and Sales price. The table is currently empty. At the bottom of the window, there are four buttons: Delete, Print, Close, and Update.

A record of all the equipment a client has is stored here. Select the client from the drop down box, or enter the clients account number and press the 'Enter' key. Enter each piece of equipment the client has entering the date purchased if the client purchased the equipment from you and the purchase and selling price.

Press update to save the information.

## Build Equipment

The 'Build Equipment' window has a title bar with a close button. It contains several input fields: 'Item No' (dropdown), 'Date' (calendar), 'Stock Code' (text), 'Description' (text), and 'Serial' (text). Below these fields are two tabs: 'Material' and 'Resources'. The 'Material' tab is active, showing a table with the following columns: Stock No., Description, Serial Number, Qty., Cost Price, and Total Cost. The table has one row with a red border. Below the table, there are three input fields: 'Selling Price', 'Wholesale Price', and 'Alt Price'. To the right of these fields is a 'Total' label and a text box. At the bottom of the window, there are five buttons: Stock Insert, Delete, New, Close, and Update.

Equipment can be built from stock purchased to form a new stock item. The details are made up from Material and Resources, Resources can be the time a technician spends building the item.

Enter a new Stock Code and description for the item to be built and give it a serial number if desired. Add each stock item in the materials grid by pressing 'F2' or entering the stock code. Enter the quantity to use. The cost price is shown for the stock item, this can be edited.

Press the 'Resource' tab to enter the resources needed to build the item.

Enter the task description the hours needed and select the resource from the drop down list. the cost is then calculated by the hours times the cost.

You have to enter a Selling Price before you can save the item. There are two other prices Wholesale price and Alt price which can be used when selling the equipment. To save the item press 'Update' this stores the details but does not add the item to stock. When you are ready to sell the item press the 'Stock Insert' button, this add a single item to stock and removes the items selected from stock to build the item. If you build more that one item you can call this item up by selecting the item no form the 'Item No' drop down box.

## Resource Administration

Description	Resource	Cost

Resources can be Labour costs, Equipment hire etc. There are two categories Labour and equipment that can be selected, enter the description for the resource and select the category from the drop down box and the cost. If the resource is labour the cost will be per hour. Press 'Update' to save the resource.

## Service Contract

### Service Contract Administration

Equipment	Amount	Payment Frequency	Start Date	Termination Date
-----------	--------	-------------------	------------	------------------

Service contracts that clients have with you are captured here. Select the client by pressing 'F2' or enter the clients account number or select from the drop down box.

Select the client's equipment from the Equipment drop down box or type in the description of the equipment. To select the equipment you must have built the equipment, if the equipment was a piece that the client had before entering the description. Enter the amount to charge for the period selected. The period can be 'Monthly', 'Quarterly', 'Bi-Annually' or 'Annually', this is selected from the drop down box. Enter the starting date and ending date of the contract.

Press update to save the contract.

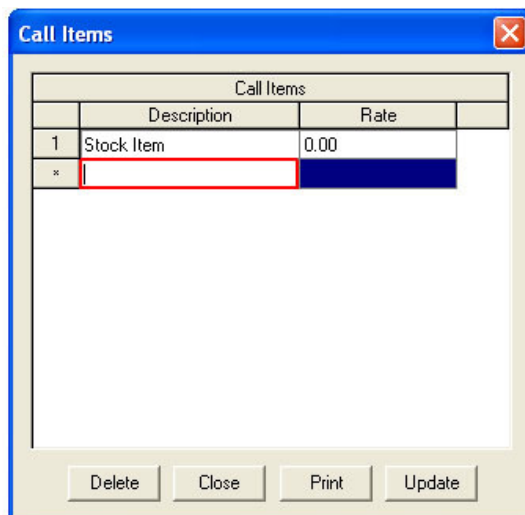

### Invoice Service Contracts

Service contracts are invoiced for the different periods selected.

When you enter the dialog a list of service contracts are shown with the last date they were invoiced, when you press the 'Invoice' button all the contracts that need to be invoiced are printed and then marked as invoiced for the period.

## Call Management

### Call Item Administration

The 'Call Items' window displays a table with columns 'Description' and 'Rate'. The first row contains 'Stock Item' and '0.00'. A second row is highlighted with a red border, showing a blank 'Description' field and a dark blue 'Rate' field. Below the table are buttons for 'Delete', 'Close', 'Print', and 'Update'.

	Description	Rate
1	Stock Item	0.00
*		

Call Items can be a stock item that is needed or the technician's time etc.

When you enter the screen you will see that 'Stock Item' is already inserted for you, there is no rate as this will be taken from the stock item selected.

You can enter any description and rate for the item, if no rate is inserted it is treated as a stock item. Press 'Update' to save the items.

### Log Calls

The 'Log Calls' window contains a 'Call History' table on the left and a form on the right. The form includes fields for 'Account No', 'Client', 'Reference No', 'Technician' (with a dropdown menu), 'Equipment' (with a dropdown menu), 'Call Date' (12 October 2011), 'Time' (06:48:27 AM), 'Call Description', 'Date Completed' (12 October 2011), 'Time' (06:48:27 AM), 'Work Done', and a 'Call items' table. The 'Call items' table has columns 'Items', 'Description', 'Qty', and 'Rate'. Buttons at the bottom include 'Delete', 'Close', 'Update', and 'Invoice'.

Date	Description
------	-------------

Technician: OFFICE  
Equipment:   
Call Date: 12 October 2011 Time: 06:48:27 AM  
Call Description:   
Date Completed: 12 October 2011 Time: 06:48:27 AM  
Work Done:   
Call items table: 

Items	Description	Qty	Rate
-------	-------------	-----	------

Calls are logged by selecting the client from the drop down box or entering the clients account number and pressing the 'Enter' key.

A list of all the calls done for the client are shown in the Call History list, you can double click on any of the calls to edit or view the call details.

For a new call select the technician from the drop down list or by pressing the 'Technician' button. Select the client's equipment that needs a service from the drop down button or by pressing the 'Equipment' button.

The client's equipment is derived from the equipment you inserted under the 'Client' 'Equipment Administration'. If the piece of equipment is not there you can type the name in the box provided.

Enter the description of the call and press 'Update' to save and print a work docket.

Once the call is completed you can then select the call in the call history list and enter the work done and any item used by selecting the item from the drop down list in the all Items list. If you select a stock item a list of stock is shown from where you can select the item. You can then enter the quantity. If a item is inserted that has a rate the rate is inserted in the rate column and you can insert the quantity. You can press 'Update' to save the information or press 'Invoice' which will save the information and print an invoice to forward to the client.

## Reports

### Service History

The 'Service History' window features a 'Client Account No.' field at the top. Below it is a 'Full History' checkbox and two date pickers for 'Period From' and 'To', both set to '12 October 2011'. The main area contains a table with the following headers: 'Call Description', 'Date Entered', 'Work Done', 'Date Completed', and 'Technician'. The table body is currently empty. At the bottom, there are 'Close', 'Print', and 'List' buttons.

This report shows all the work performed for the selected client. You can list the history for a period by selecting the Period From and To dates and pressing 'List'

If you want to view all the work performed for the client check the 'Full History' check box and press 'List'.

### Technician Schedule

The 'Technician Schedule' window has a 'Technician' dropdown menu set to 'All'. It also includes 'Date From' and 'To' date pickers, both set to '12 October 2011'. The table headers are 'Reference No.', 'Date Entered', 'Client', 'Call Description', 'Date Complete', and 'Work Done'. The table body is empty. The bottom controls include 'Close', 'Export', 'Print', and 'List' buttons.

A schedule of all the work performed for a select technician or all the technicians can be viewed with this report. Select the technician from the drop down list or leave 'All' as the entry if you want to view all the technicians, then select the date from and to and press 'List' to view the information.

### Equipment Built / Manufactured

The 'Equipment Built and Manufactured for a period.' window shows 'Period From' and 'Period To' date pickers, both set to '12 October 2011'. The table headers are 'Item No.', 'Description', 'Serial No.', 'Date', 'Sell Price', 'Cost Price', 'Qty', 'Total', and 'In Stock'. The table body is empty. The bottom controls include 'Close', 'Export', 'Print', and 'List' buttons.

A list of all the Equipment builds for the period selected is shown here. Select the 'Period From' and 'To' dates and press 'List'.

This displays the equipment build, by clicking on the '+' sign you can see the material and resources used.

## Setting up the program for first time use

Pos Management can be setup using the Backend program Accounts management or from the Pos screen if you are a Supervisor.

Login to the program with the password setup in Accounts Management.

Click on the  Icon to enter the Back Office program.

The sales person can use the back office to capture Invoices and do credit notes etc.

They also can do the daily cashup here.

The instructions on how to use these options is in the main manual.

## Using the Program

Items can be scanned in using a barcode scanner or the stock code can be entered via the number pad key selection, you can also use the quick stock buttons to select common items sold.

If you enter the stock code via the number pad you will need to press the Enter Button.

Once all the items have been scanned in you need to press

	<p>The cash button if the person is paying cash.</p>
	<p>If the person is paying by credit card and you want to enter the card number press this button.</p>
	<p>Finally press this button to save the transaction and print the receipt.</p>

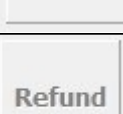

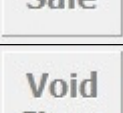

### Transaction management buttons.

	If there is more than one item with the same code you can press the repeat button to enter each item.
	If there is more than one item you can enter the quantity and there will be a single line for this item.
	This is the backspace key if you need to delete a character in the code selected.
	If you have a code that has alpha characters and don't have a keyboard you can enter the code via the system keyboard.
	If the code is not scanned you can search for the item in the system by selection search.
	If you want to display the info about a stock item but do not want to enter it into the transaction been captured you can select this button and enter the code then press enter.

### Supervisor transactions

Press the Supervisor Button and enter the password and then the buttons will be enabled.

	If the shop wants to offer a discount it can be entered here.
	If you want to put the transaction on hold and return to it you can press Hold and the transaction will be halted.
	When you are ready to return to the transaction you can press recall and finalize the sale.
	If an item has been brought back you can refund the person by pressing Refund
	This will delete the total sale if this is pressed.
	You can select an item in the list and press Void Item to remove this item from the sale.

Cancel OK

You can search for an item by typing the code or description.

To do this use the tab key to select what column you want to search in, then type the details and the items with the info will be displayed.

Press OK to select the item or double click the line of the item.

# Using the Program

## Adding Stock Items to the Database

Before the program can be used the stock needs to be entered into the system.

To do this each stock item needs to be declared in the system, this is done through 'Stock Administration' under the 'Stock' menu.

A screenshot of the 'Stock Description Capture' dialog box. It features several input fields and dropdown menus. The 'Stock Code' field is at the top, followed by 'Description' and 'Serial'. Below these are 'Department' and 'Retail Calculation' (set to 'Manual Charge'). The 'Bin' dropdown is set to 'Front Shop'. A grid of fields follows: 'Unit Cost', 'Packet Size', 'Retail Markup' (0.00), 'Retail Price', 'Wholesale Markup' (0.00), 'Wholesale Price', 'Alt Markup' (0.00), 'Alt. Price', 'Re - Order Level', 'Re - Order Qty', and 'Weight'. At the bottom right are checkboxes for 'Store Serial No.' and 'No Barcode Printing'. At the bottom are buttons for 'Delete', 'Edit S/No.', 'New', 'Close', and 'Update'.

1. Each stock item needs a unique code this can be a code entered by yourself or a barcode on the item been captured, click the mouse in the Stock Code box and enter a code or use a barcode reader to read the code on the item.
2. Click on the Description box and enter a description of the item.
3. Click on the Unit Cost box and enter what the item costs you (This is optional).
4. Click on the retail box and enter how much you are selling the item for.
5. Click Update to save the item in the stock database.

## Loading Stock into the Database

Now that we have all the items descriptions and codes in the database we now have to enter the stock that has been purchased into the system so that they can be sold.

This can be done using 'Goods Received Voucher' under the 'Creditors' menu, or 'Bulk GRV Capture' under the 'Creditors' menu. We will be using 'Bulk GRV Capture'

1. Select the supplier from the drop down list.
2. Enter the Stock Code in the Stock Code box and press 'Tab', this will add the item to the list.
3. You can also select the stock item by pressing the 'F2' key.

4. You can select the stock item from the list or type the code and the items with the code will be shown, double click the list or click OK to select the item.
5. Once all the items have been inserted you must enter the quantity for each item.
6. Click on the 'Qty to Insert' column for each item and insert the amount bought.
7. Once all the items have been entered press 'Update' to update the database.
8. If Print Label is 'Yes' a label will be printed for each item, if the item has a barcode on its label select No for print Labels.

Do this for each supplier that items have been purchased from.

You only have to add stock items to the database once or if you buy a new item that has not been entered into the database.

Every time you purchase items from a supplier all you need to do is Bulk GRV.

## Selling Stock

Stock can be sold via the Pos Terminal or from the program itself.

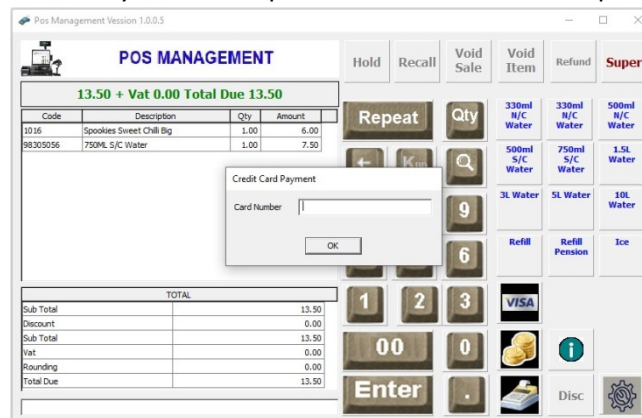

## Selling using the Pos Terminal

1. You can use a barcode scanner to scan the barcode of the stock item or you can press the numeric keys for the code of the item.
2. You can also click the keys of the stored items if they are been sold.

After all the items sold are scanned in you need to press the Visa Button if the person is paying via credit card

You can enter the card number if you need to keep a record of it or press OK to continue.

If the person pays cash select the Coin Button

Enter the amount given and press OK

Press the Cash Register key to complete the transaction and print a receipt.

## Selling using the program

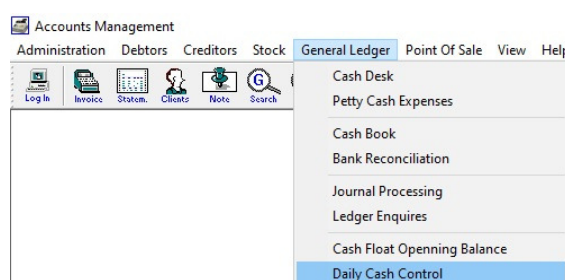

Select 'Pos Invoice' from the 'Debtors' menu this allows you to sell stock from within the program.

1. You can select stock items by scanning the barcode.
2. You can also select stock by entering the code via the keyboard.
3. You can also press 'F2' and select via the list that is shown.
4. If the item is sold as a cash item do not select the client by pressing the 'Client' button.
5. You must select the sales person to know who sold the item.
6. Press 'Print' if you want to print a receipt or 'Update' to save the invoice.

## Daily Cash Control

At the end of the day you will need to balance the money taken for the day, to do the press 'Daily Cash Control' from the 'General Ledger' menu.
